

FORTUNA GLOBE 750 WG FUNGICIDE

FEATURES	BENEFITS
Wettable Granule Formulation (WG)	Easy to use formulation with minimal dust.
Manufactured in Europe	Made to EU quality standards.
3-year expiry date from manufacture	Stable formulation. Flexibility to have product on hand and know that you have time to use it.
Fine particle size	Superior plant tissue surface coverage.
Excellent weathering/sticking properties	Longevity of protection on the plant tissue surface.
Extensive registration	Registered on a wide range of fruit, vegetable & nut crops.
20kg Bag	Easy to handle.

- Active Constituent:** 750g/kg Mancozeb
- Formulation:** Wettable Granule
- Resistance Group:** Group M3 Fungicide
- Pack Size:** 20kg bag

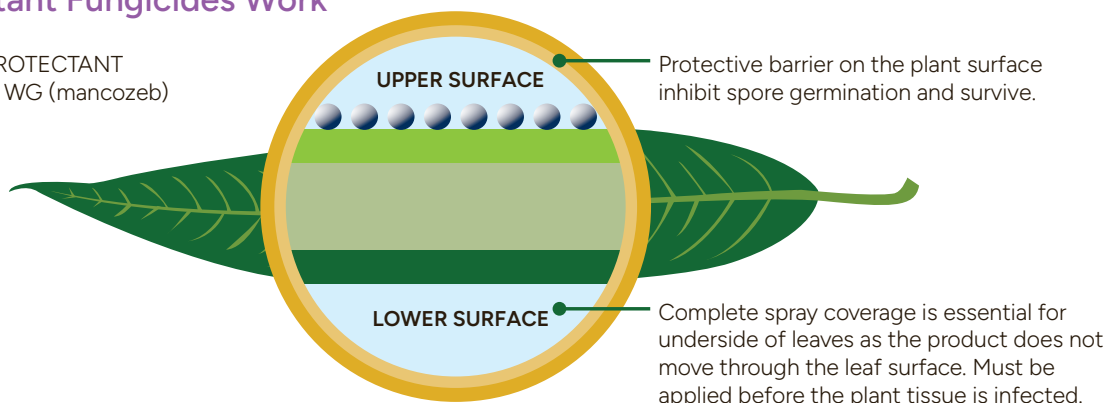

Mancozeb is a **dithiocarbamate** non-systemic agricultural **fungicide** with multi-site and protective action on contact. A protective film is formed on the plant surface that inhibits the germination of fungal spores.

Mancozeb reacts with and inactivates the sulfhydryl groups of amino acids and enzymes within fungal cells. This results in disruption of lipid metabolism, respiration, and production of adenosine triphosphate.

FUNGICIDE PERFORMANCE

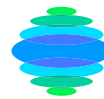

How Protectant Fungicides Work

NON SYSTEMIC PROTECTANT
Fortuna Globe 750 WG (mancozeb)

FORTUNA GLOBE 750 WG

**FORTUNA GLOBE
750 WG****INFO SHEET****TIMING FOR BEST RESULTS**

Seasonal Conditions: Fortuna Globe 750WG should be applied before any major weather event or overhead irrigation.

Growth Stage: Fortuna Globe can be used over most growth stages of the crop cycle. For best results apply as part of a regular protectant program and should be reapplied to protect new growth and weathering of product on a regular basis.

TARGET DISEASES ON KEY HORTICULTURAL CROPS* All rates are per 100 L of water

	Vine & Tree	Vegetable	Cole Crops & Cucurbits	Fruit & Tree
Alternaria leaf spot		150 to 200 g	150 to 200 g	
Anthracnose	150 to 200 g	150 to 200 g	150 to 200 g	
Anthracnose Leaf Mould (<i>Fulvia fulva</i>)		150 to 200 g		
Bitter rot	150 to 200 g			
Black pit				200 g plus spray oil
Black spot	150 to 200 g			
Brown citrus mite	200 g plus spray oil			
Brown Rot	150 to 200 g			
Brown spot (<i>Alternaria passiflorae</i>)	150 to 200 g			
Cercospora leaf spot		150 to 200 g		
Cordana leaf spot				200 g plus spray oil
Citrus bud mite	200 g plus spray oil			
Citrus rust mite	200 g plus spray oil			
Cordana leaf spot				
Downy mildew	150 to 200 g	150 to 200 g	150 to 200 g	
Early blight (target spot)		150 to 200 g		
Fly speck	150 to 200 g			
Freckle	150 to 200 g			
Fruit speckle				200 g plus spray oil
Grey leaf spot		150 to 200 g		
Gummy Stem blight			150 to 200 g	
Late blight (Irish blight)		150 to 200 g		
Leaf speckle				200 g plus spray oil
Leaf spot (<i>Mycosphaerella musicola</i>)				200 g plus spray oil
Phoma rot		150 to 200 g		
Phomopsis Cane and Leaf spot	150 to 200 g			
Pseudocercospora fruit spot	150 to 200 g			
Purple blotch		150 to 200 g		
Ring spot			150 to 200 g	
Rite fruit spot	150 to 200 g			
Rust	150 to 200 g	150 to 200 g		
Septoria spot	150 to 200 g	150 to 200 g	150 to 200 g	
Shot Hole	150 to 200 g			
Sooty blotch	150 to 200 g			
Target spot	150 to 200 g	150 to 200 g		

*Always refer to label before use.

FORTUNA GLOBE COMPATIBILITY

Fortuna Globe is compatible with other fungicides and insecticides.

Always refer to Label prior to use with other products.
